Doris Plum

NEW OR OF SPECIAL VALUE.

BLACKBERRY, HIMALAYA GIANT.

(Never before offered.)

The vines, which are quite thorny, make an annual growth of fifteen or twenty feet. The large berries which ripen in September are very sweet, with an unusual rich, pleasant flavor, with rather larger seeds than usual. They grow thickly in enormous clusters, twelve to eighteen inches long and as much in circumference, giving the appearance of a gallon or so to each cluster. Like Black Cap Raspberries, propagates from tips only. Probably hardy where most cultivated berries are. Rooted tips, each 60c. 10 for \$2.00. Large bushes, each \$1.00.

BLACKBERRY, RED HYBRID.

(Never before offered.)

Similar to "Logan" but larger and of much better quality. Large plants only 35c each; per 10, \$2.50.

HYBRID PLUM DORIS, NEW.

Cross of Myroholen and Satsuma. Grows readily from Cuttings. Fruit yellow, medium size, excellent quality and trees very productive. Grafting wood only, 2 feet, 25c, 10 feet, \$1.00.

SEA SAND GRASS. (ArunoArenaria.)

Extensively used with great success to prevent sand from drifting on sea-shores and other places. Roots 20c each; \$1 for 10.

ROSE, PEACH BLOW.

(*Never before offered.*)

It is impossible to do this Rose justice by description, as the peculiar shading is something not before developed in Roses to the extent that it is in this one. The inside of the petals is a pale, silvery, peach pink, like La France; the reverse, dark, bronzy carmine pink. When the buds are opening the effect can be imagined. One of the heartiest of plants, compact growing, with large healthy foliage. Strong field plants, each 4oc; 10 for \$2.50.

BRITISH AMERICAN BUNCH GRASS

(*Glyceria.*) Grows in tall close bunches like pampas grass. Roots each 2oc; per 10, \$1.

CALIFORNIA LAUREL. (*Umbellularia.*)

Seedlings grown form a very handsome weeping tree. 1 to 2 feet, each 3oc; per 10, \$2.

POLYGONUM MULTIFLORUM.

A rapid growing, ornamental, tuberous climber. The tubers of the size of sweet potatoes, grow in the most strange and curious forms imaginable, long, flat, round, square, triangular and oval, with all possible combinations. 75c each; per 10, \$4.

CLEMATIS MONGOLICA.

A hardy, floriferous, easily grown, YELLOW Clematis. Strong plants each 4oc; 10 for \$2.50.

IMPORTANT.

Please notice that I have no nursery. That I do not raise or deal in a general way in any kind of trees or plants. I have private experimental farms and OFFER OCCASIONALLY some novelties and my SURPLUS STOCK, as in this circular.

It will save me some thousands of postage stamps per annum and a great amount of priceless time, wasted uselessly, if the above is generally understood.

In correspondence be VERY BRIEF.
